OPERATOR ENVIRONMENT

Operator Station

- Spacious canopy/cab with unobstructed floor provides the operator with ample leg room
- Large travel pedals
- Upper rail sliding door
- Air conditioning provides a comfortable operating space throughout the year
- Fully adjustable cloth suspension seat reduces operator fatigue
- PPC joystick controls are low effort and provide fine control
- 7" color monitor is easy to see and operate

FEATURES

Tight Tail Swing

The operator can focus more on the work in front and worry less about a rear swing impact, even in confined areas with only an 220 mm 8.7" projection over the tracks.

Pattern Change Valve

Whether you are comfortable with ISO or SAE, you can easily change from one to the other.

Excellent Visibility

The operator's station design allows the operator to maintain a 360° field-of-view.

7" Color LCD Monitor

The liquid crystal display can be easily read at various angles and lighting conditions. Simple and easy to operate switches. Industry-first function keys facilitate multi-function operations. Displays data in 12 languages.

Ground Level Maintenance

With the left and right side service doors, it is possible to access the major maintenance points from ground level.

Side-by-side Cooling

Since oil cooler, aftercooler and radiator are arranged side-by-side, it is easy to clean, remove, and install them. Radiator, aftercooler, and oil cooler made of aluminum have high cooling efficiency and are easily recycled.

Neutral Engine Start System

Locks out drives and hydraulics during machine start up.

Manual Selector Valve

Allows the operator to switch between one-way (Breaker) and two-way auxiliary hydraulic flow (Thumb).

Large Diameter Swing Pin

Has high durability and maintains suitable clearances between pin and bushing after long-term operation.

Extended Maintenance Intervals

Lubricate swing circle	500 hrs
Lubricate boom & arm	500 hrs
Replace engine oil and filter	500 hrs
